Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a method for forming a liquid crystal alignment, classified in class 349, subclass 124.
 - II. Claims 11-24, drawn to a method for forming a liquid crystal cell and a liquid crystal cell, classified in class 349, subclasses 187 and 123.

2. The inventions are distinct, each from the other because of the following reasons:
Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed in Group II does not require the particulars of the subcombination as claimed in Group I because the subcombination can be used combination other than the combination in Group I..

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2871

4. If Group II is elected is above, a further election to one of the following inventions is required under 35 U.S.C. 121:

(IIA). Claim 24, drawn to a liquid crystal display device, classified in class 349, subclass 123.

(IIB) . Claims 11-23, drawn to a method of manufacturing the liquid crystal display device, classified in class 349, subclass 187.

5. The inventions are distinct, each from the other because of the following reasons:

Inventions IIB and IIA are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed in Group IIA can be made by another and materially different process other the claimed process in Group IIB.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and the search required for Group IIA is not required for Group IIB, restriction for examination purposes as indicated is proper.

Art Unit: 2871

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
